Position	Number of adamantane subunits	Tetramantane n=4	Pentamantane m=5	Hexamantane n=6	Heptamantane m=7
57	Number Type	n-2 = 2 all secondary	m-2 = 3 all secondary	n-3 = 3 all secondary	m-3 = 4 all secondary
58	Number Type	n-2 = 2 all secondary	m-3 = 2 all secondary	n-3 = 3 all secondary	m-4 = 3 all secondary
51	Number Type	n-1 = 3 2 tertiary carbons at the ends  1 quaternary carbon in the middle	m-1 = 4 2 tertiary carbons at the ends  2 quaternary carbons in the middle	n-2 = 4 2 tertiary carbons at the ends  2 quaternary carbons in the middle	m-2 = 5 2 tertiary carbons at the ends  3 quaternary carbons in the middle
54	Number Type	n-1 = 3 2 tertiary carbons at the ends  1 quaternary carbon in the middle	m-2 = 3 2 tertiary carbons at the ends  1 quaternary carbon in the middle	n-2 = 4 2 tertiary carbons at the ends  2 quaternary carbons in the middle	m-2 = 5 2 tertiary carbons at the ends  2 quaternary carbons in the middle
52, 56	Number Type	n-1 = 3 1 secondary, 1 tertiary carbon at the ends  1 tertiary carbon in the middle	m-1 = 4 2 secondary carbons at the ends  2 tertiary carbons in the middle	n-2 = 4 1 secondary, 1 tertiary carbon at the ends  2 tertiary carbons in the middle	m-2 = 5 2 secondary carbons at the ends  3 tertiary carbons in the middle
53, 55	Number Type	n-1 = 3 1 secondary, 1 tertiary carbon at the ends  1 tertiary carbon in the middle	m-2 = 3 2 tertiary carbons at the ends  1 tertiary carbon in the middle	n-2 = 4 1 secondary, 1 tertiary carbon at the ends  2 tertiary carbons in the middle	m-3 = 4 2 tertiary carbons at the ends  2 tertiary carbons in the middle
